

Guest Lecture:

Framing the nexus between gender
& climate change

February 28th

Faculty of Tropical AgriSciences
room 128, **9.45 - 12.00**

Dr. **Maxime Forest** from Yellow Window and Sciences Po, Paris is an expert an expert in policy analysis and **gender equality** with a 15 years long experience.

While diverse streams of eco-feminism have addressed the gendered dimensions of environmental degradation and preservation, gender considerations were fully included to the global agenda of climate action only in the mid-2010s.
