

Biogas Research Team is ready to accept Marie Skłodowska-Curie Postdoctoral Fellowships (MSCA-PF)

Postdoctoral fellowships are open to researchers moving within Europe, as well as those coming in from other parts of the world. You can also restart a research career after a break, such as parental leave.

It can help researchers coming back to Europe find a new position. Feel free to contact Group leader of Biogas Research Team and discuss your research proposal:

Dr. Hynek Roubík (roubik@ftz.czu.cz)

- **What is it?**

- MSCA-PF is continuation of MSCA Individual Fellowship (MSCA-IF) that was part of the Horizon 2020 programme (last MSCA-IF call took place in September 2020). MSCA-PF is part of the programme Horizon Europe. The rules for MSCA under Horizon Europe haven't been officially published yet; information on this page come mostly from [draft MSCA Work Programme](#) and must be therefore regarded as indicative.

- **What does it support?**

- The MSCA-PF grant supports an individual research stay (1-2 years) connected with international mobility (the project must take place in a country different from where the fellow has currently worked or studied).
- The applicant-fellow must possess a PhD degree and have less than 8 years of full-time research experience since obtaining it. The project can be in any research field. The grant should support career development of the fellow and help him/her to reach or re-enforce a position of professional maturity or independence. The host institution can be from academic or from non-academic sector.

- **Deadline?**

- Deadline is once a year, ca. in mid-September. The project can, at the earliest, start ca. in May of the following year. Usually, the projects begin in September of the year following after the deadline.

- Eligibility conditions for the fellow:
 - He/she must at the date of the call deadline hold the PhD degree (he/she doesn't need to have the certificate itself, but successful defence of the PhD thesis must have taken place.)
 - New: At the call deadline, the fellow must have a maximum of 8 years full-time equivalent experience in research since obtaining the PhD degree (years of experience outside research and career breaks, e.g. due to parental leave, won't be taken into account).
 - In the country, where the fellowship takes place, the fellow must fulfil the mobility rule: He/she must not have carried out his/her main activity (work, studies, etc.) in this country for more than 12 months in the 3 years before the call deadline.
- **What to do?**
- You need to prepare the proposal in close collaboration with me as host at the host institution ([Biogas Research Team](#) at [Faculty of Tropical AgriSciences, Czech University of Life Sciences Prague](#)). The proposals are submitted online via [the Funding & Tender Opportunities Portal](#).
- Formally, the applicant is the host institution, represented by me as the Group leader.
- **So, feel free to contact Group leader of Biogas Research Team and discuss your research proposal:**
